

design

96 x 48 x 141mm

analog / digital

- ✓ 2 pulse inputs and 1 reset input
- ✓ programmable measuring function for: rotation speed, speed, processing time (reciprocal rotation speed), various counting and stop watch functions, speed from propagation time
- ✓ power supply +24V DC
- ✓ adjustable scale factor
- ✓ 15mm high 6-digit LED display
- ✓ screw terminals

**2 switching outputs, analog output  
RS232 / RS485 interface**

### description

These multifunction devices are suitable for various operating modes. By connecting a single-track sensor, it is possible to display the speed, cycle or processing time. In the counter mode, also twin track sensors can be used. As such, the **WY05** is particularly suitable as well as display equipment for linear measurements. Apart from this, there is the possibility of forming totals/differences for the count inputs A and B.

The display is freely scalable, a preset value is programmable. Likewise, the 'stopwatch' and 'determining speed by measuring the run time' operating modes are also available.

Three variants with different configurations are available. The **WY054900** offers two freely-programmable optocoupler switching outputs which relate to the display. The

**WY054905** has an analog output which relates to the display. -10 ... +10V, 0 ... 10V, 0/4 ... 20mA are programmable as standard output signals.

The **WY054902** has a serial interface, which can be used to connect the device with a PC.

The **WY05** can be run on 17 ... 30V DC as well as 115/230V AC. For connecting a sensor (max. 120mA), a 24V DC auxiliary voltage output is also available.

### application examples

- ▶ rotation speed or cycle display
- ▶ unit counter
- ▶ display for linear measurement
- ▶ speed measurement
- ▶ stopwatch

article-no.	WY054900
output	2 x PNP

article-no.	WY054905
output	0/4 ... 20mA and/or -10 ... +10V DC

### TECHNICAL DATA

output signal	see above
operating voltage	115 / 230V AC; 17 ... 30V DC
current consumption (w/o load)	18V DC: 120mA, 24V DC: 95mA, 30V: 80mA
power consumption	7.5VA
output current (max. load)	150mA
power supply	24V DC $\pm 15\%$ , 120mA (AC and DC)
input	2 x pulse, 1 x reset (pnp, npn, intrinsically safe)
input frequency	counter: 100kHz, A/B: 25kHz, reset: 1kHz
accuracy	$\pm 1$ digit
display	6 decades LED
short-circuit protection	+
reverse polarity protection	+
housing material	Noryl UL94
design	48x96x141mm
operating temperature	0 ... +45°C
system of protection (EN 60529)	frontal IP65, backside IP20
connection	terminals
