

TRIPWIRE LOG CENTER QUICK START

◆ *"Our experience with Tripwire has been excellent. From sale to installation, Tripwire gave us the impression that it is a partnership –not just a sale."* ◆

**CENTRAL VALLEY
COMMUNITY BANK**

Tripwire's Quick Start offering is designed for smaller implementations of Tripwire® Log Center®. It is offered at two levels, depending your requirements and deployment scale. Quick Start enables you to quickly implement the core capabilities of Tripwire Log Center, and introduces you to new features of the current release. This package is also suitable for larger deployments seeking to implement Tripwire Log Center within a subset of their operational environment with the intent of taking ownership of the complete implementation themselves.

QUICK START

Tripwire's Quick Start implementation includes two possible levels of configuration, each of which has several options to choose from to ensure the best match and quickest implementation. Tripwire also offers additional add-on services to best meet your specific needs.

QUICK START, LEVEL 1 DELIVERABLES

- » Install and configure Tripwire Log Center Manager
- » Installation and configuration complete for up to:
 - 100 assets of up to five types
 - 10 stock correlation rules
 - Five additional Secondary Managers

QUICK START, LEVEL 2 DELIVERABLES

- » Install and configure Tripwire Log Center Manager
- » Installation and configuration complete for up to:
 - 200 assets of up to 10 types
 - 20 stock correlation rules
 - 10 additional Secondary Managers

ADDITIONAL STANDARD DELIVERABLES

- » All appropriate Collectors configured
- » Successful collection and storage of events
- » Author and implement event and correlation rules
- » Implement notification alerts
- » Report creation, configuration, and scheduling for up to 10 reports for key metrics
- » Configure up to three role-based dashboards
- » Provide knowledge transfer on the following areas:
 - Server overview
 - System maintenance
 - Reporting configuration, use, and scheduling
 - Alerts
 - Role assignments
- » Complete Closeout Report detailing:
 - Manager, Collector and Database configuration
 - Rule set specification
 - Report set specification
 - User role assignments
 - Data collection and scheduling specifications

QUICK START PREREQUISITES

- » Supported hardware must be available to house the Tripwire Log Center Manager and database prior to onsite implementation
- » Asset lists must be provided with the hostname, IP address, and communication method (DCOM, syslog, etc.) prior to onsite implementation
- » Network Devices asset list must be provided that includes IP address, device type and OS, and log type (Syslog, SNMP)
- » Access to AD/LDAP and database nodes to be granted by customer before onsite implementation

LET TRIPWIRE CUSTOMER SERVICES BE YOUR GUIDE

◆ By working closely with your staff, Tripwire Services will turn your Tripwire Log Center solution into a seamless—and integral—part of your operations. With efficient and smooth integration into the process and workflow of your organization, the benefits of upgrading your Tripwire solution will be quickly realized. ◆

◆ Tripwire is a leading provider of advanced threat, security and compliance solutions that enable enterprises, service providers and government agencies to confidently detect, prevent and respond to cybersecurity threats. Tripwire solutions are based on high-fidelity asset visibility and deep endpoint intelligence combined with business-context, and enable security automation through enterprise integration. Tripwire's portfolio of enterprise-class security solutions includes configuration and policy management, file integrity monitoring, vulnerability management and log intelligence.
