

**HIRSCHMANN**A **BELDEN** BRAND**MAKE THE SWITCH –  
AND SAVE AN ADDITIONAL****20 %**

## Next Generation HIRSCHMANN Devices

The next generation of Hirschmann switches and wireless devices combines high performance with robust security. It offers intelligent and unique combinations of various security mechanisms, comprehensive management and diagnostic methods, precise time synchronization and network redundancy protocols to meet every physical and application requirement.

- + Redundancy:** An extensive number of standardized and proprietary redundancy mechanisms to meet any requirement
- + Security:** Comprehensive security mechanisms protect networks against attacks and operating errors
- + Ease of Use:** An intuitive graphical interface, comprehensive command line interface, and full SNMP support meet every management challenge

**Upgrade your network  
to the next generation  
Hirschmann devices now**

For every next generation device bought to exchange an existing switch or wireless device we offer you an additional discount of 20%\*.

**Interested?**

Please contact your Belden sales representative.

### Even More Benefits: Now Through 31 December 2020

Belden helps you shift to the latest technology through a trade-in campaign to replace existing equipment with next generation devices.

The overview of next generation devices that are eligible for this trade-in program are listed in the table below.

Devices for Exchange **	Next Generation Devices
SPIDER I / SPIDER II	SPIDER-SL, SPIDER-PL
RS2x/3x/40	BRS2x/3x/4x/5x
MS4128, MS3124, MS20/30 + MMxx	MSP3x/4x + MSMxx
MACH4002	DRAGON MACH4x00
BAT-C	BAT-C2
BAT-54, BAT-300	BAT867, OpenBAT-F/-R, BAT450

\* Additional discount of 20% is applied on standard net prices.

\*\* Units traded-in cannot exceed number of new units bought. Additional discount recognized against proof of material dismantled (serial numbers) or proof of scrapping.

Trade-in campaign applies to EMEA and AMERICAS regions only.

**Be certain. Belden.**
